Technical Information

Sparta - Range

Sparta is an acoustic panel with a simple design, that provides a broadband absorption range.

Sparta is aimed for people who want to maintain neutral aesthetics in their home cinema, but require a proper acoustic solution. In line with this concept, Artnovion also created a speaker cover version, a visually identical solution that allows for speaker integration.

Sparta Speaker is made using an acoustically transparent fabric, carefully developed to preserve the speaker response pattern.

Sparta is an acoustic panel with a simple design fashioned for an absorption treatment range from 350 Hz up to 8000 Hz.
